SEO Fix Guide

https://drarvindkumar.com
Audit #287 · 2026-05-05 11:03 · Overall 83/100

Total issues: **26** · High: **2** · Medium: **17** · Low: **7**

High (2)

High | Meta | Priority 65/100 | Easy (~15m)

OpenGraph image present

Missing <meta property="og:image">.

Location

Line **9** · `html > head`

```
     8  <html lang="en">
>    9  <head>
    10
```

Generic best practice

Add an Open Graph image so links to this page render as a rich card on social platforms. Use 1200x630 px, JPEG/PNG, under 1MB.

Code fix

Before:

```
<head>
  <!-- no og:image -->
</head>
```

After:

```
<head>
  <meta property="og:image" content="https://yoursite.com/og-image.jpg">
  <meta property="og:image:width" content="1200">
  <meta property="og:image:height" content="630">
</head>
```

High | Images | Priority 64/100 | Easy (~15m)

Images have alt text

83 of 172 images missing alt attribute.

Location

Line **244** · `html > div.site-loader > div.load_img > img`

```
   243  <div class="site-loader">
>  244   <div class="load_img"><img src="https://drarvindkumar.com/images/loader.svg"></div>
   245  </div>
```

Generic best practice

Every <img> needs an alt attribute. Alt text helps screen readers, image search ranking, and shows when the image fails to load. Use alt="" only for purely decorative images.

Code fix

Before:

```
<img src="photo.jpg">
```

After:

```
<img src="photo.jpg" alt="Descriptive text describing the image content">
```

Medium (17)

Medium | Page speed | Priority 73/100 | Medium (~45m)

Largest Contentful Paint

Needs improvement: 2.93s.

Generic best practice

Largest Contentful Paint should load within 2.5s. Optimise the largest above-the-fold element: compress hero images, preload critical assets, and eliminate render-blocking resources.

Code fix

Before:

```
<img src="hero.jpg">
```

After:

```
<link rel="preload" as="image" href="hero.webp">
<img src="hero.webp" fetchpriority="high" width="1200" height="600" alt="...">
```

Medium | Meta | Priority 68/100 | Trivial (~5m)

Title length

Title is 67 characters — likely truncated in SERPs.

Location

Line **17** · `html > head > title`

```
    16
>   17  <title> Best Chest & Thoracic Surgeon in Delhi NCR, India| Dr. Arvind Kumar </title>
    18
```

Generic best practice

Title is outside the 30-60 character sweet spot. Google truncates titles longer than ~60 chars in search results, hiding your keywords. Keep the primary keyword near the start.

Code fix

Before:

```
<title>67 chars</title>
```

After:

```
<title>Shortened title — primary keyword first (?60 chars)</title>
```

Medium | Page speed | Priority 68/100 | Easy (~15m)

Cumulative Layout Shift

Needs improvement: 0.132.

Generic best practice

Cumulative Layout Shift should be under 0.1. Set explicit width/height on images, reserve space for embeds and ads, and avoid late-loading fonts that re-flow text.

Code fix

Before:

```
<img src="photo.jpg">
```

After:

```
<img src="photo.jpg" width="800" height="600" alt="...">
```

Medium | Page speed | Priority 64/100 | Medium (~45m)

PageSpeed performance score

Score 76/100 — improve.

Generic best practice

Open Lighthouse in Chrome DevTools or PageSpeed Insights — the report lists specific opportunities ranked by impact.

Medium Images Priority 63/100 Easy (~15m)

Images have dimensions

163/172 images have explicit dimensions.

Location

Line **244** · `html > div.site-loader > div.load_img > img`

```
   243  <div class="site-loader">
>  244   <div class="load_img"><img src="https://drarvindkumar.com/images/loader.svg"></div>
   245  </div>
```

Generic best practice

Set explicit width/height on every <img> to prevent Cumulative Layout Shift. Browser reserves the box before the image loads.

Code fix

Before:

```
<img src="photo.jpg" alt="...">
```

After:

```
<img src="photo.jpg" width="800" height="600" alt="...">
```

Medium Content Priority 62/100 Medium (~45m)

E-E-A-T: Expertise

Moderate:

Generic best practice

Show expertise: author bio with credentials, citations to reputable sources, in-depth coverage of the topic, technical accuracy.

Medium Content Priority 62/100 Medium (~45m)

E-E-A-T: Trustworthiness

Moderate:

Generic best practice

Add trust signals: clear contact info, privacy policy, terms of service, customer reviews, security badges, real photos of team/location.

Medium Meta Priority 59/100 Trivial (~5m)

Meta description length

Description is 216 characters — likely truncated.

Location

Line **19** · `html > head > meta:nth-of-type(3)`

```
    18
>   19  <meta name="description" content=" Discover the expertise of Prof. (Dr.) Arvind Kumar, Indias best
chest & thoracic surgeon in Delhi NCR, India, renowned for exceptional surgical skills, awards, and leadership
in the Association of Surgeons…
    20
```

Generic best practice

Meta description is outside the 120-160 character range. Too short = thin content; too long = truncated by Google.

Code fix

Before:

```
<meta name="description" content="216 chars">
```

After:

```
<meta name="description" content="Rewritten description, 120-160 chars, with the primary keyword and a value
proposition.">
```

Medium | Page speed | Priority 59/100 | Easy (~15m)

Compression enabled

No gzip/brotli content-encoding header.

Generic best practice

Enable gzip or Brotli compression on your server. Typically cuts text payload by 70-80% — easy LCP win.

Medium | Content | Priority 58/100 | Hard (~120m)

E-E-A-T: Experience

Moderate:

Generic best practice

Demonstrate first-hand experience: original photos, personal anecdotes, before/after results, screenshots from the actual product/service.

Medium | Content | Priority 58/100 | Hard (~120m)

E-E-A-T: Authoritativeness

Moderate:

Generic best practice

Build authoritativeness: links from respected sites in your niche, mentions in industry publications, About page detailing your expertise.

Medium | Ssl security | Priority 54/100 | Easy (~15m)

HSTS header present

Missing strict-transport-security header.

Generic best practice

Add Strict-Transport-Security header so browsers refuse HTTP for your domain after the first visit. Bumps SSL Labs grade to A+.

Code fix

After:

```
Strict-Transport-Security: max-age=31536000; includeSubDomains
```

Medium | Links | Priority 53/100 | Easy (~15m)

External links safe

4 external _blank links missing rel=noopener.

Generic best practice

Add rel="noopener noreferrer" to target="_blank" links. Without noopener, the linked page can manipulate your window object — security + perf risk.

Code fix

Before:

```
<a href="https://other.com" target="_blank">External</a>
```

After:

```
<a href="https://other.com" target="_blank" rel="noopener noreferrer">External</a>
```

Medium | Geo | Priority 48/100 | Medium (~45m)

Content provides clear answers

Moderate (5/10).

Generic best practice

Lead each section with a direct, citable answer to the question users would ask. AI engines (ChatGPT, Perplexity) cite the clearest, most specific sentences.

Medium Geo Priority 48/100 Medium (~45m)

High factual density

Moderate (5/10).

Generic best practice

Add concrete facts — numbers, dates, percentages, named sources. Vague prose doesn't get cited; specific data does.

Medium Geo Priority 48/100 Medium (~45m)

Structured for AI extraction

Moderate (5/10).

Generic best practice

Add bulleted lists, sub-headings, definitions, and TL;DR sections. AI engines prefer clearly structured content for extraction.

Medium Geo Priority 48/100 Medium (~45m)

Cites authoritative sources

Moderate (5/10).

Generic best practice

Cite authoritative external sources (links, references). Pages that cite reputable sources are themselves cited more often.

Low (7)

Low Images Priority 49/100 Medium (~45m)

Modern image formats

96/172 images use modern formats.

Generic best practice

Convert images to WebP or AVIF — typically 25-50% smaller than JPEG/PNG with no visible quality loss. Use <picture> for fallback.

Code fix

Before:

```
<img src="photo.jpg">
```

After:

```
<picture>
  <source type="image/avif" srcset="photo.avif">
  <source type="image/webp" srcset="photo.webp">
  <img src="photo.jpg" alt="...">
</picture>
```

Low Links Priority 43/100 Easy (~15m)

Descriptive anchor text

47% of anchor texts are generic ("click here", etc.).

Generic best practice

Replace generic anchor text ("click here", "read more") with descriptive phrases containing the target page's keywords. Anchors are a strong relevance signal.

Code fix

Before:

```
<a href="/laptops">click here</a>
```

After:

```
<a href="/laptops">programming laptops review</a>
```

Low Content Priority 43/100 Medium (~45m)

Readable prose

Flesch reading ease 46.5 — fairly difficult.

Generic best practice

Simplify your prose. Shorter sentences (15-20 words), smaller words (1-2 syllables), more paragraph breaks. Target 8th-grade reading level for a general audience.

Low Meta Priority 40/100 Trivial (~5m)

Twitter card present

Missing <meta name="twitter:card">.

Location

Line **9** · `html > head`

```
     8  <html lang="en">
>    9  <head>
    10
```

Generic best practice

Add a twitter:card meta tag to control how Twitter renders shared links. Use "summary_large_image" with an og:image for the best preview.

Code fix

Before:

```
<!-- no twitter:card -->
```

After:

```
<meta name="twitter:card" content="summary_large_image">
```

Low Headings Priority 40/100 Medium (~45m)

Sufficient H2 tags

Only 1 H2 tags.

Generic best practice

Use H2s to break content into scannable sections. Pages with no H2 read as a wall of text — worse for users and for search relevance.

Code fix

Before:

```
<!-- no H2 sections -->
```

After:

```
<h2>First Major Section</h2>
<p>...</p>
<h2>Second Major Section</h2>
<p>...</p>
```

Low Ssl security Priority 39/100 Trivial (~5m)

X-Content-Type-Options

Missing x-content-type-options header.

Generic best practice

Add X-Content-Type-Options: nosniff so browsers honour the Content-Type and don't MIME-sniff for malicious files.

Code fix

After:

```
X-Content-Type-Options: nosniff
```

Low | Ssl security | Priority 32/100 | Medium (~45m)

CSP header present

Missing content-security-policy header.

Generic best practice

Add a Content-Security-Policy header to block XSS by whitelisting allowed script/style sources.

Code fix

After:

```
Content-Security-Policy: default-src 'self'; script-src 'self' 'unsafe-inline'
```
