SEO Fix Guide

https://cliniceximus.com/liposuction-cost-in-delhi/
Audit #547 · 2026-06-11 01:39 · Overall 83/100

Total issues: **21** · High: **4** · Medium: **15** · Low: **2**

High (4)

High | Page speed | Priority 83/100 | Medium (~45m)

Largest Contentful Paint

Poor: 10.28s.

Generic best practice

Largest Contentful Paint should load within 2.5s. Optimise the largest above-the-fold element: compress hero images, preload critical assets, and eliminate render-blocking resources.

Code fix

Before:

```
<img src="hero.jpg">
```

After:

```
<link rel="preload" as="image" href="hero.webp">
<img src="hero.webp" fetchpriority="high" width="1200" height="600" alt="...">
```

High | Page speed | Priority 74/100 | Medium (~45m)

PageSpeed performance score

Score 36/100 — poor.

Generic best practice

Open Lighthouse in Chrome DevTools or PageSpeed Insights — the report lists specific opportunities ranked by impact.

High | Page speed | Priority 74/100 | Medium (~45m)

First Contentful Paint

Poor: 5.25s.

Generic best practice

First Contentful Paint should be under 1.8s. Inline critical CSS, defer non-critical CSS/JS, and use a CDN.

High | Images | Priority 64/100 | Easy (~15m)

Images have alt text

1 of 15 images missing alt attribute.

Location

Line **243** · `html > head > noscript > img`

```
   242  src="https://www.facebook.com/tr?id=3828799350523761&ev=PageView&noscript=1"
>  243  /></noscript>
   244  <!-- End Meta Pixel Code -->
```

Generic best practice

Every <img> needs an alt attribute. Alt text helps screen readers, image search ranking, and shows when the image fails to load. Use alt="" only for purely decorative images.

Code fix

Before:

```
<img src="photo.jpg">
```

After:

```
<img src="photo.jpg" alt="Descriptive text describing the image content">
```

Medium (15)

Medium · Meta · Priority 68/100 · Trivial (~5m)

Title length

Title is 61 characters — likely truncated in SERPs.

Location

Line **19** · `html > head > title`

```
    18  <!-- Search Engine Optimization by Rank Math - https://rankmath.com/ -->
>   19  <title>Liposuction Cost in Delhi: 5 Factors That Influence the Price</title>
    20  <meta name="description" content="Starting from Rs 80,000, explore the 5 key factors that influence
liposuction cost in Delhi. Get a detailed cost breakdown and expert tips to minimize your overall expense."/>
```

Generic best practice

Title is outside the 30-60 character sweet spot. Google truncates titles longer than ~60 chars in search results, hiding your keywords. Keep the primary keyword near the start.

Code fix

Before:

```
<title>61 chars</title>
```

After:

```
<title>Shortened title — primary keyword first (?60 chars)</title>
```

Medium · Images · Priority 63/100 · Easy (~15m)

Images have dimensions

13/15 images have explicit dimensions.

Location

Line **243** · `html > head > noscript > img`

```
   242  src="https://www.facebook.com/tr?id=3828799350523761&ev=PageView&noscript=1"
>  243  /></noscript>
   244  <!-- End Meta Pixel Code -->
```

Generic best practice

Set explicit width/height on every <img> to prevent Cumulative Layout Shift. Browser reserves the box before the image loads.

Code fix

Before:

```
<img src="photo.jpg" alt="...">
```

After:

```
<img src="photo.jpg" width="800" height="600" alt="...">
```

Medium · Content · Priority 62/100 · Medium (~45m)

E-E-A-T: Expertise

Moderate:

Generic best practice

Show expertise: author bio with credentials, citations to reputable sources, in-depth coverage of the topic, technical accuracy.

Medium · Content · Priority 62/100 · Medium (~45m)

E-E-A-T: Trustworthiness

Moderate:

Generic best practice

Add trust signals: clear contact info, privacy policy, terms of service, customer reviews, security badges, real photos of team/location.

Medium | Meta | Priority 59/100 | Trivial (~5m)

Meta description length

Description is 172 characters — likely truncated.

Location

Line **20** · `html > head > meta:nth-of-type(3)`

```
    19  <title>Liposuction Cost in Delhi: 5 Factors That Influence the Price</title>
>   20  <meta name="description" content="Starting from Rs 80,000, explore the 5 key factors that influence
liposuction cost in Delhi. Get a detailed cost breakdown and expert tips to minimize your overall expense."/>
    21  <meta name="robots" content="index, follow, max-snippet:-1, max-video-preview:-1, max-image-
preview:large"/>
```

Generic best practice

Meta description is outside the 120-160 character range. Too short = thin content; too long = truncated by Google.

Code fix

Before:

```
<meta name="description" content="172 chars">
```

After:

```
<meta name="description" content="Rewritten description, 120-160 chars, with the primary keyword and a value
proposition.">
```

Medium | Page speed | Priority 59/100 | Easy (~15m)

Compression enabled

No gzip/brotli content-encoding header.

Generic best practice

Enable gzip or Brotli compression on your server. Typically cuts text payload by 70-80% — easy LCP win.

Medium | Content | Priority 58/100 | Hard (~120m)

E-E-A-T: Experience

Moderate:

Generic best practice

Demonstrate first-hand experience: original photos, personal anecdotes, before/after results, screenshots from the actual product/service.

Medium | Content | Priority 58/100 | Hard (~120m)

E-E-A-T: Authoritativeness

Moderate:

Generic best practice

Build authoritativeness: links from respected sites in your niche, mentions in industry publications, About page detailing your expertise.

Medium | Ssl security | Priority 54/100 | Easy (~15m)

HSTS header present

Missing strict-transport-security header.

Generic best practice

Add Strict-Transport-Security header so browsers refuse HTTP for your domain after the first visit. Bumps SSL Labs grade to A+.

Code fix

After:

```
Strict-Transport-Security: max-age=31536000; includeSubDomains
```

Medium Links Priority 53/100 Easy (~15m)

External links safe

12 external _blank links missing rel=noopener.

Generic best practice

Add rel="noopener noreferrer" to target="_blank" links. Without noopener, the linked page can manipulate your window object — security + perf risk.

Code fix

Before:

```
<a href="https://other.com" target="_blank">External</a>
```

After:

```
<a href="https://other.com" target="_blank" rel="noopener noreferrer">External</a>
```

Medium Content Priority 53/100 Medium (~45m)

Readable prose

Flesch reading ease -293.3 — very difficult.

Generic best practice

Simplify your prose. Shorter sentences (15-20 words), smaller words (1-2 syllables), more paragraph breaks. Target 8th-grade reading level for a general audience.

Medium Geo Priority 48/100 Medium (~45m)

Content provides clear answers

Moderate (5/10).

Generic best practice

Lead each section with a direct, citable answer to the question users would ask. AI engines (ChatGPT, Perplexity) cite the clearest, most specific sentences.

Medium Geo Priority 48/100 Medium (~45m)

High factual density

Moderate (5/10).

Generic best practice

Add concrete facts — numbers, dates, percentages, named sources. Vague prose doesn't get cited; specific data does.

Medium Geo Priority 48/100 Medium (~45m)

Structured for AI extraction

Moderate (5/10).

Generic best practice

Add bulleted lists, sub-headings, definitions, and TL;DR sections. AI engines prefer clearly structured content for extraction.

Medium Geo Priority 48/100 Medium (~45m)

Cites authoritative sources

Moderate (5/10).

Generic best practice

Cite authoritative external sources (links, references). Pages that cite reputable sources are themselves cited more often.

Low (2)

Low Images Priority 49/100 Medium (~45m)

Modern image formats

9/15 images use modern formats.

Generic best practice

Convert images to WebP or AVIF — typically 25-50% smaller than JPEG/PNG with no visible quality loss. Use <picture> for fallback.

Code fix

Before:

```
<img src="photo.jpg">
```

After:

```
<picture>
  <source type="image/avif" srcset="photo.avif">
  <source type="image/webp" srcset="photo.webp">
  <img src="photo.jpg" alt="...">
</picture>
```

Low Ssl security Priority 39/100 Trivial (~5m)

X-Content-Type-Options

Missing x-content-type-options header.

Generic best practice

Add X-Content-Type-Options: nosniff so browsers honour the Content-Type and don't MIME-sniff for malicious files.

Code fix

After:

```
X-Content-Type-Options: nosniff
```
