

SEO Fix Guide

https://nayraivf.com/
Audit #497 · 2026-06-10 06:45 · Overall 84/100

Total issues: 22 · High: 2 · Medium: 15 · Low: 5

High (2)

HighMetaPriority 78/100Trivial (~5m)

Meta description present

No meta description found.

Location

Line 3 · html > head

```
> 2 <html lang="en-US">
  3 <head>
  4 <meta charset="UTF-8">
```

Generic best practice

Add a meta description (120-160 characters) summarising the page. It appears under the title in search results and directly affects click-through rate.

Code fix

Before:

```
<head>
  <!-- no meta description -->
</head>
```

After:

```
<head>
  <meta name="description" content="Compelling 120-160 character summary describing what's on this page and why a user should click.">
</head>
```

HighHeadingsPriority 73/100Easy (~15m)

H1 tag present

No <h1> found.

Location

Line 142 · html > body.home

```
141 </head>
> 142 <body class="home wp-singular page-template-default page page-id-7 wp-custom-logo wp-embed-responsive
wp-theme-hello-elementor hello-elementor-default elementor-kit-6 elementor-page elementor-
page-7">
143
```

Generic best practice

Every page needs exactly one <h1> tag — the primary heading. It tells both users and search engines what the page is about, and is the strongest on-page ranking signal.

Code fix

Before:

```
<body>
  <div>Page content with no H1</div>
</body>
```

After:

```
<body>
  <h1>Your Main Page Heading</h1>
  <!-- rest of content -->
</body>
```

Medium (15)

Medium Page speed Priority 73/100 Medium (~45m)

Largest Contentful Paint

Needs improvement: 3.9s.

Generic best practice

Largest Contentful Paint should load within 2.5s. Optimise the largest above-the-fold element: compress hero images, preload critical assets, and eliminate render-blocking resources.

Code fix

Before:

```

```

After:

```
<link rel="preload" as="image" href="hero.webp">

```

Medium Meta Priority 68/100 Trivial (~5m)

Title length

Title is 71 characters — likely truncated in SERPs.

Location

Line 10 · html > head > title

```
9 <!-- This site is optimized with the Yoast SEO plugin v26.9 - https://yoast.com/product/yoast-seo-
wordpress/ -->
> 10 <title>Home - Best IVF Centre in Noida, Most Trusted Fertility Clinic in India</title>
11 <link rel="canonical" href="https://nayraivf.com/" />
```

Generic best practice

Title is outside the 30-60 character sweet spot. Google truncates titles longer than ~60 chars in search results, hiding your keywords. Keep the primary keyword near the start.

Code fix

Before:

```
<title>71 chars</title>
```

After:

```
<title>Shortened title – primary keyword first (?60 chars)</title>
```

Medium Page speed Priority 64/100 Medium (~45m)

PageSpeed performance score

Score 77/100 — improve.

Generic best practice

Open Lighthouse in Chrome DevTools or PageSpeed Insights — the report lists specific opportunities ranked by impact.

Medium Page speed Priority 64/100 Medium (~45m)

First Contentful Paint

Needs improvement: 2.58s.

Generic best practice

First Contentful Paint should be under 1.8s. Inline critical CSS, defer non-critical CSS/JS, and use a CDN.

Medium Content Priority 62/100 Medium (~45m)

E-E-A-T: Expertise

Moderate:

Generic best practice

Show expertise: author bio with credentials, citations to reputable sources, in-depth coverage of the topic, technical accuracy.

Medium Content Priority 62/100 Medium (~45m)

E-E-A-T: Trustworthiness

Moderate:

Generic best practice

Add trust signals: clear contact info, privacy policy, terms of service, customer reviews, security badges, real photos of team/location.

Medium Page speed Priority 59/100 Easy (~15m)

Compression enabled

No gzip/brotli content-encoding header.

Generic best practice

Enable gzip or Brotli compression on your server. Typically cuts text payload by 70-80% — easy LCP win.

Medium Content Priority 58/100 Hard (~120m)

E-E-A-T: Experience

Moderate:

Generic best practice

Demonstrate first-hand experience: original photos, personal anecdotes, before/after results, screenshots from the actual product/service.

Medium Content Priority 58/100 Hard (~120m)

E-E-A-T: Authoritativeness

Moderate:

Generic best practice

Build authoritativeness: links from respected sites in your niche, mentions in industry publications, About page detailing your expertise.

Medium Ssl security Priority 54/100 Easy (~15m)

HSTS header present

Missing strict-transport-security header.

Generic best practice

Add Strict-Transport-Security header so browsers refuse HTTP for your domain after the first visit. Bumps SSL Labs grade to A+.

Code fix

After:

```
Strict-Transport-Security: max-age=31536000; includeSubDomains
```

Medium Links Priority 53/100 Easy (~15m)

External links safe

1 external _blank links missing rel=noopener.

Generic best practice

Add rel="noopener noreferrer" to target="_blank" links. Without noopener, the linked page can manipulate your window object — security + perf risk.

Code fix

Before:

```
<a href="https://other.com" target="_blank">External</a>
```

After:

```
<a href="https://other.com" target="_blank" rel="noopener noreferrer">External</a>
```

Medium Geo Priority 48/100 Medium (~45m)

Content provides clear answers

Moderate (5/10).

Generic best practice

Lead each section with a direct, citable answer to the question users would ask. AI engines (ChatGPT, Perplexity) cite the clearest, most specific sentences.

Medium Geo Priority 48/100 Medium (~45m)

High factual density

Moderate (5/10).

Generic best practice

Add concrete facts — numbers, dates, percentages, named sources. Vague prose doesn't get cited; specific data does.

Medium Geo Priority 48/100 Medium (~45m)

Structured for AI extraction

Moderate (5/10).

Generic best practice

Add bulleted lists, sub-headings, definitions, and TL;DR sections. AI engines prefer clearly structured content for extraction.

Medium Geo Priority 48/100 Medium (~45m)

Cites authoritative sources

Moderate (5/10).

Generic best practice

Cite authoritative external sources (links, references). Pages that cite reputable sources are themselves cited more often.

Low (5)

Low Technical Priority 52/100 Medium (~45m)

Response time acceptable

Fetches in 1635 ms — acceptable but slow.

Generic best practice

Server is slow. Investigate: enable a CDN, add page caching, optimise database queries, upgrade hosting. TTFB > 800ms hurts every Core Web Vital.

Low Images Priority 49/100 Medium (~45m)

Modern image formats

14/25 images use modern formats.

Generic best practice

Convert images to WebP or AVIF — typically 25-50% smaller than JPEG/PNG with no visible quality loss. Use <picture> for fallback.

Code fix

Before:

```

```

After:

```
<picture>
  <source type="image/avif" srcset="photo.avif">
  <source type="image/webp" srcset="photo.webp">
  
</picture>
```

Low Content Priority 43/100 Medium (~45m)

Readable prose

Flesch reading ease 38.1 — fairly difficult.

Generic best practice

Simplify your prose. Shorter sentences (15-20 words), smaller words (1-2 syllables), more paragraph breaks. Target 8th-grade reading level for a general audience.

Low Ssl security Priority 39/100 Trivial (~5m)

X-Content-Type-Options

Missing x-content-type-options header.

Generic best practice

Add X-Content-Type-Options: nosniff so browsers honour the Content-Type and don't MIME-sniff for malicious files.

Code fix

After:

```
X-Content-Type-Options: nosniff
```

Low Ssl security Priority 32/100 Medium (~45m)

CSP header present

Missing content-security-policy header.

Generic best practice

Add a Content-Security-Policy header to block XSS by whitelisting allowed script/style sources.

Code fix

After:

```
Content-Security-Policy: default-src 'self'; script-src 'self' 'unsafe-inline'
```
