

SEO Fix Guide

https://drgargis.com/blog/bikini-laser-hair-reduction-in-india-a-complete-dermatologists-guide/
Audit #809 · 2026-06-17 10:39 · Overall 83/100

Total issues: 20 · High: 4 · Medium: 14 · Low: 2

High (4)

High

Page speed

Priority 83/100

Medium (~45m)

Largest Contentful Paint

Poor: 4.8s.

Generic best practice

Largest Contentful Paint should load within 2.5s. Optimise the largest above-the-fold element: compress hero images, preload critical assets, and eliminate render-blocking resources.

Code fix

Before:

After:

<link rel="preload" as="image" href="hero.webp">

High

Page speed

Priority 78/100

Easy (~15m)

Cumulative Layout Shift

Poor: 0.638.

Generic best practice

Cumulative Layout Shift should be under 0.1. Set explicit width/height on images, reserve space for embeds and ads, and avoid late-loading fonts that re-flow text.

Code fix

Before:

After:

High

Page speed

Priority 74/100

Medium (~45m)

PageSpeed performance score

Score 22/100 — poor.

Generic best practice

Open Lighthouse in Chrome DevTools or PageSpeed Insights — the report lists specific opportunities ranked by impact.

High

Page speed

Priority 74/100

Medium (~45m)

First Contentful Paint

Poor: 3.93s.

Generic best practice

First Contentful Paint should be under 1.8s. Inline critical CSS, defer non-critical CSS/JS, and use a CDN.

Medium (14)

Medium Meta Priority 68/100 Trivial (~5m)

Title length

Title is 70 characters — likely truncated in SERPs.

Location

Line **14** · html > head > title

```
13 <!-- Search Engine Optimization by Rank Math - https://rankmath.com/ -->
> 14 <title>Bikini Laser Hair Reduction in India: A Complete Dermatologist's Guide</title>
15 <meta name="description" content="Experience safe, doctor-led bikini laser hair reduction in Gurgaon.
Achieve natural, smooth skin with advanced laser technology. Learn about cost, procedure, and sessions for
long-lasting results."/>
```

Generic best practice

Title is outside the 30-60 character sweet spot. Google truncates titles longer than ~60 chars in search results, hiding your keywords. Keep the primary keyword near the start.

Code fix

Before:

```
<title>70 chars</title>
```

After:

```
<title>Shortened title – primary keyword first (?60 chars)</title>
```

Medium Content Priority 62/100 Medium (~45m)

E-E-A-T: Expertise

Moderate:

Generic best practice

Show expertise: author bio with credentials, citations to reputable sources, in-depth coverage of the topic, technical accuracy.

Medium Content Priority 62/100 Medium (~45m)

E-E-A-T: Trustworthiness

Moderate:

Generic best practice

Add trust signals: clear contact info, privacy policy, terms of service, customer reviews, security badges, real photos of team/location.

Medium Meta Priority 59/100 Trivial (~5m)

Meta description length

Description is 196 characters — likely truncated.

Location

Line **15** · html > head > meta:nth-of-type(4)

```
14 <title>Bikini Laser Hair Reduction in India: A Complete Dermatologist's Guide</title>
> 15 <meta name="description" content="Experience safe, doctor-led bikini laser hair reduction in Gurgaon.
Achieve natural, smooth skin with advanced laser technology. Learn about cost, procedure, and sessions for
long-lasting results."/>
16 <meta name="robots" content="index, follow, max-snippet:-1, max-video-preview:-1, max-image-
preview:large"/>
```

Generic best practice

Meta description is outside the 120-160 character range. Too short = thin content; too long = truncated by Google.

Code fix

Before:

```
<meta name="description" content="196 chars">
```

After:

```
<meta name="description" content="Rewritten description, 120-160 chars, with the primary keyword and a value
proposition.">
```

Medium Page speed Priority 59/100 Easy (~15m)

Compression enabled

No gzip/brotli content-encoding header.

Generic best practice

Enable gzip or Brotli compression on your server. Typically cuts text payload by 70-80% — easy LCP win.

Medium Content Priority 58/100 Hard (~120m)

E-E-A-T: Experience

Moderate:

Generic best practice

Demonstrate first-hand experience: original photos, personal anecdotes, before/after results, screenshots from the actual product/service.

Medium Content Priority 58/100 Hard (~120m)

E-E-A-T: Authoritativeness

Moderate:

Generic best practice

Build authoritativeness: links from respected sites in your niche, mentions in industry publications, About page detailing your expertise.

Medium Headings Priority 54/100 Easy (~15m)

Single H1 tag

Found 2 H1 tags — best practice is exactly one.

Location

Line 676 · #header-wrapper > section.main-title-section-wrapper > div.main-title-section-container > div.container > div.main-title-section:nth-of-type(2) > h1

```
675         <div class="container">
> 676         <div class="breadcrumb"><a href="https://drgargis.com/">Home</a><span class="breadcrumb-
default-delimiter"></span><a href="https://drgargis.com/blog/category/laser-hair-removal/">Laser Hair
Removal</a><span class="breadcrumb-def...
677         </div>
```

Generic best practice

Use exactly one <h1> per page. Multiple H1s confuse search engines about the main topic. Demote secondary H1s to H2.

Code fix

Before:

```
<h1>Main Title</h1>
<h1>Secondary Title</h1>
```

After:

```
<h1>Main Title</h1>
<h2>Secondary Title</h2>
```

Medium Links Priority 53/100 Easy (~15m)

External links safe

1 external _blank links missing rel=noopener.

Generic best practice

Add rel="noopener noreferrer" to target="_blank" links. Without noopener, the linked page can manipulate your window object — security + perf risk.

Code fix

Before:

```
<a href="https://other.com" target="_blank">External</a>
```

After:

```
<a href="https://other.com" target="_blank" rel="noopener noreferrer">External</a>
```

Medium Content Priority 53/100 Medium (~45m)

Readable prose

Flesch reading ease -7.3 — very difficult.

Generic best practice

Simplify your prose. Shorter sentences (15-20 words), smaller words (1-2 syllables), more paragraph breaks. Target 8th-grade reading level for a general audience.

Medium Geo Priority 48/100 Medium (~45m)

Content provides clear answers

Moderate (5/10).

Generic best practice

Lead each section with a direct, citable answer to the question users would ask. AI engines (ChatGPT, Perplexity) cite the clearest, most specific sentences.

Medium Geo Priority 48/100 Medium (~45m)

High factual density

Moderate (5/10).

Generic best practice

Add concrete facts — numbers, dates, percentages, named sources. Vague prose doesn't get cited; specific data does.

Medium Geo Priority 48/100 Medium (~45m)

Structured for AI extraction

Moderate (5/10).

Generic best practice

Add bulleted lists, sub-headings, definitions, and TL;DR sections. AI engines prefer clearly structured content for extraction.

Medium Geo Priority 48/100 Medium (~45m)

Cites authoritative sources

Moderate (5/10).

Generic best practice

Cite authoritative external sources (links, references). Pages that cite reputable sources are themselves cited more often.

Low (2)

Low Technical Priority 52/100 Medium (~45m)

Response time acceptable

Fetches in 1380 ms — acceptable but slow.

Generic best practice

Server is slow. Investigate: enable a CDN, add page caching, optimise database queries, upgrade hosting. TTFB > 800ms hurts every Core Web Vital.

Low Images Priority 49/100 Medium (~45m)

Modern image formats

4/5 images use modern formats.

Generic best practice

Convert images to WebP or AVIF — typically 25-50% smaller than JPEG/PNG with no visible quality loss. Use <picture> for fallback.

Code fix

Before:

```

```

After:

```
<picture>
  <source type="image/avif" srcset="photo.avif">
  <source type="image/webp" srcset="photo.webp">
  
</picture>
```
