

SEO Fix Guide

https://smhairtransplant.org/will-my-hair-transplant-look-natural/
Audit #929 · 2026-07-26 11:23 · Overall 85/100

Total issues: 23 · High: 3 · Medium: 16 · Low: 4

High (3)

High

Page speed

Priority 83/100

Medium (~45m)

Largest Contentful Paint

Poor: 6.23s.

Generic best practice

Largest Contentful Paint should load within 2.5s. Optimise the largest above-the-fold element: compress hero images, preload critical assets, and eliminate render-blocking resources.

Code fix

Before:

```

```

After:

```
<link rel="preload" as="image" href="hero.webp">

```

High

Page speed

Priority 74/100

Medium (~45m)

First Contentful Paint

Poor: 5.56s.

Generic best practice

First Contentful Paint should be under 1.8s. Inline critical CSS, defer non-critical CSS/JS, and use a CDN.

High

Spam security

Priority 74/100

Hard (~120m)

No injected/obfuscated code

Potential hacked/injected-code signals: large inline base64 blob.

Generic best practice

Potential hacked-site/injected-code signals found. Scan source for obfuscated scripts and hidden iframes, check for unexpected admin users and recently modified files, restore from a clean backup, update CMS/plugins, then request a review in Search Console.

Code fix

Before:

```
<script>eval(atob("...base64..."))</script>
```

After:

```
<!-- remove injected script; patch the vulnerability that allowed it -->
```

Medium (16)

Medium

Page speed

Priority 64/100

Medium (~45m)

PageSpeed performance score

Score 64/100 — improve.

Generic best practice

Open Lighthouse in Chrome DevTools or PageSpeed Insights — the report lists specific opportunities ranked by impact.

Medium Content Priority 62/100 Medium (~45m)

E-E-A-T: Expertise

Moderate:

Generic best practice

Show expertise: author bio with credentials, citations to reputable sources, in-depth coverage of the topic, technical accuracy.

Medium Content Priority 62/100 Medium (~45m)

E-E-A-T: Trustworthiness

Moderate:

Generic best practice

Add trust signals: clear contact info, privacy policy, terms of service, customer reviews, security badges, real photos of team/location.

Medium Meta Priority 59/100 Trivial (~5m)

Meta description length

Description is 176 characters — likely truncated.

Location

Line 1 · html > head > meta:nth-of-type(3)

```
> 1 <!DOCTYPE html><html dir="ltr" lang="en-US" prefix="og: https://ogp.me/ns#"><head><script data-no-  
optimize="1">var  
litespeed_docref=sessionStorage.getItem("litespeed_docref");litespeed_docref&&(Object.defineProperty(document,  
"referrer",{get...  
2 <style id="wp-img-auto-sizes-contain-inline-css">img:is([sizes=auto i],[sizes^="auto," i]){contain-  
intrinsic-size:3000px 1500px}
```

Generic best practice

Meta description is outside the 120-160 character range. Too short = thin content; too long = truncated by Google.

Code fix

Before:

```
<meta name="description" content="176 chars">
```

After:

```
<meta name="description" content="Rewritten description, 120-160 chars, with the primary keyword and a value  
proposition.">
```

Medium Page speed Priority 59/100 Easy (~15m)

Compression enabled

No gzip/brotli content-encoding header.

Generic best practice

Enable gzip or Brotli compression on your server. Typically cuts text payload by 70-80% — easy LCP win.

Medium Images Priority 59/100 Medium (~45m)

Modern image formats

No images use webp/avif.

Generic best practice

Convert images to WebP or AVIF — typically 25-50% smaller than JPEG/PNG with no visible quality loss. Use <picture> for fallback.

Code fix

Before:

```

```

After:

```
<picture>
  <source type="image/avif" srcset="photo.avif">
  <source type="image/webp" srcset="photo.webp">
  
</picture>
```

Medium Content Priority 58/100 Hard (~120m)

E-E-A-T: Experience

Moderate:

Generic best practice

Demonstrate first-hand experience: original photos, personal anecdotes, before/after results, screenshots from the actual product/service.

Medium Content Priority 58/100 Hard (~120m)

E-E-A-T: Authoritativeness

Moderate:

Generic best practice

Build authoritativeness: links from respected sites in your niche, mentions in industry publications, About page detailing your expertise.

Medium Ssl security Priority 54/100 Easy (~15m)

HSTS header present

Missing strict-transport-security header.

Generic best practice

Add Strict-Transport-Security header so browsers refuse HTTP for your domain after the first visit. Bumps SSL Labs grade to A+.

Code fix

After:

```
Strict-Transport-Security: max-age=31536000; includeSubDomains
```

Medium Links Priority 53/100 Easy (~15m)

External links safe

7 external _blank links missing rel=noopener.

Generic best practice

Add rel="noopener noreferrer" to target="_blank" links. Without noopener, the linked page can manipulate your window object — security + perf risk.

Code fix

Before:

```
<a href="https://other.com" target="_blank">External</a>
```

After:

```
<a href="https://other.com" target="_blank" rel="noopener noreferrer">External</a>
```

Medium Content Priority 53/100 Medium (~45m)

Readable prose

Flesch reading ease 27.6 — very difficult.

Generic best practice

Simplify your prose. Shorter sentences (15-20 words), smaller words (1-2 syllables), more paragraph breaks. Target 8th-grade reading level for a general audience.

Medium Geo Priority 48/100 Medium (~45m)

Content provides clear answers

Moderate (5/10).

Generic best practice

Lead each section with a direct, citable answer to the question users would ask. AI engines (ChatGPT, Perplexity) cite the clearest, most specific sentences.

Medium Geo Priority 48/100 Medium (~45m)

High factual density

Moderate (5/10).

Generic best practice

Add concrete facts — numbers, dates, percentages, named sources. Vague prose doesn't get cited; specific data does.

Medium Geo Priority 48/100 Medium (~45m)

Structured for AI extraction

Moderate (5/10).

Generic best practice

Add bulleted lists, sub-headings, definitions, and TL;DR sections. AI engines prefer clearly structured content for extraction.

Medium Geo Priority 48/100 Medium (~45m)

Cites authoritative sources

Moderate (5/10).

Generic best practice

Cite authoritative external sources (links, references). Pages that cite reputable sources are themselves cited more often.

Medium Domain security Priority 44/100 Easy (~15m)

Security headers configured

Most security headers are missing: strict-transport-security, x-content-type-options, x-frame-options, referrer-policy.

Generic best practice

Add the recommended HTTP security headers at the server/CDN level to harden the site.

Code fix

Before:

```
# missing headers
```

After:

```
# nginx
add_header X-Frame-Options "SAMEORIGIN";
add_header X-Content-Type-Options "nosniff";
add_header Referrer-Policy "strict-origin-when-cross-origin";
add_header Permissions-Policy "geolocation=(), microphone=()";
add_header Strict-Transport-Security "max-age=31536000; includeSubDomains";
```

Low (4)

Low Technical Priority 52/100 Medium (~45m)

Response time acceptable

Fetches in 1909 ms — acceptable but slow.

Generic best practice

Server is slow. Investigate: enable a CDN, add page caching, optimise database queries, upgrade hosting. TTFB > 800ms hurts every Core Web Vital.

Low Images Priority 44/100 Easy (~15m)

Below-fold images lazy

Only 0 of 8 images use loading="lazy".

Generic best practice

Add loading="lazy" to images below the fold. Saves bandwidth, speeds up initial page load.

Code fix

Before:

```

```

After:

```

```

Low Domain security Priority 43/100 Easy (~15m)

DMARC record present

DMARC present but policy is p=none (monitor only).

Generic best practice

Publish a DMARC record to tell receivers what to do with mail that fails SPF/DKIM, and where to send reports. Start at p=none to monitor, then tighten to quarantine/reject.

Code fix

Before:

```
# no _dmarc TXT record
```

After:

```
_dmarc.example.com. IN TXT "v=DMARC1; p=quarantine; rua=mailto:dmarc@example.com"
```

Low Ssl security Priority 39/100 Trivial (~5m)

X-Content-Type-Options

Missing x-content-type-options header.

Generic best practice

Add X-Content-Type-Options: nosniff so browsers honour the Content-Type and don't MIME-sniff for malicious files.

Code fix

After:

```
X-Content-Type-Options: nosniff
```
